PROFESSIONAL SUMMARY

Motivated Computer Engineering undergraduate with proven experience building full-stack web applications, architecting RESTful APIs, and implementing relational and NoSQL database schemas. Proficient in React, Next.js, FastAPI, Node.js, and Docker containerization. Committed to engineering scalable, high-performance systems and writing maintainable code. Seeking a software engineering / full-stack developer internship to apply problem-solving capabilities and contribute to production software development.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, C, SQL
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, FastAPI, REST APIs
Databases	MongoDB, PostgreSQL, MySQL
Tools	Git, GitHub, Postman, Docker
Deployment	Vercel, Railway, Render, Netlify

PROJECTS

SIH-2026 – ShadowTrace

Team Project • SIH 2026

Next.js, React, FastAPI, PostgreSQL, Docker

- Engineered a full-stack blockchain intelligence and investigation platform for multi-hop cryptocurrency transaction tracing.
- Implemented automated investigation workflows incorporating wallet clustering algorithms and transaction graph-based analysis.
- Constructed high-performance asynchronous REST APIs in FastAPI with PostgreSQL for querying complex transaction records.
- Developed an intuitive, responsive analytics dashboard using Next.js/React and containerized microservices via Docker.

Hostel Gate Pass Management System

Team Project

React.js, Node.js, Express.js, MongoDB

- Designed and deployed an end-to-end digital gate-pass management platform for student requests and warden approvals.
- Implemented secure REST API integration and role-based access control workflows for verified entry and exit permissions.
- Structured efficient MongoDB schemas and performed database operations for real-time pass status tracking and audit logs.
- Built a responsive, user-friendly frontend interface in React.js that significantly reduced approval cycle times.

Sky Glass – Weather Application

Personal Project

HTML5, CSS3, JavaScript, OpenWeather API

- Built a responsive real-time weather forecasting web application providing dynamic atmospheric updates for worldwide cities.
- Integrated OpenWeather REST API to fetch live temperature, humidity, wind metrics, and multi-day meteorological forecasts.
- Crafted an elegant, modern glassmorphic interface utilizing semantic HTML5 and smooth CSS3 animations.
- Engineered client-side asynchronous data handling, robust error boundaries, and instant location search functionality.

EDUCATION

Sir Visvesvaraya Institute of Technology (SVIT), Nashik

Graduation: 2028

Bachelor of Engineering (B.E.) – Computer Engineering

Higher Secondary Certificate (12th): 68.83% • Secondary School Certificate (10th): 82.00%
